DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Specifically, the claims are ambiguous due to the use of ~~claims 4-3~~ claim 1 having a crystalline degree expressed as weight % of the crystalline compound with respect to the total weight of the compound of at least 93%. with claim 3 being 90% and claim 5 being 95%. Claim 3 is shown above. Clarification is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patents 6287540 and 6030604. Both patents disclose

Art Unit: 1625

CN 2 (1R)-Quinolinene, 8-hydroxy-5-[(1R)-1-hydroxy-2-[(1R)-2-(4-methoxyphenyl)-1-methylethyl]amino]ethyl]-, hydrochloride (1:1) (NAME)

Absolute stereochemistry.

and

methods of making the compound which anticipates the instant claims.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patents

6287540 and 6030604. Both of these patents disclose

Art Unit: 1625

CN 2-(1R)-Quinolinene, 8-hydroxy-5-[(1R)-1-hydroxy-2-[(1R)-2-(4-methoxyphenyl)-1-methylethyl]amino]ethyl]-, hydrochloride (1:1) (NAME)

Absolute stereochemistry.

and

methods of making it. The difference between the instant claims and the teaching of Trofast is that Trofast does not specifically disclose that the HCl salt is crystalline or that it has a specific melting point or X-ray powder diffraction pattern. However, the same salt made under the same circumstances with the same process would be expected to produce the same crystalline structure.

Double Patenting

7. Claims 1-7 of this application conflict with claims of Application No. 20090280067, 20090280068 and 20090326231. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the

conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.
